DATA SCIENCE • ARTIFICIAL INTELLIGENCE • COMPUTER SCIENCE • LEADERSHIP

PROFESSIONAL SUMMARY

I am a hardworking and determined problem-solver looking for a full-time data science position. I have experience delivering projects using SQL, Python, R, Java, JavaScript, Git, Databricks, Excel, Tableau, PowerBI, matplotlib, seaborn, Google Colab, Pytorch, TensorFlow, Keras, Pandas, Spark, Polars, NumPy. My experience in cross country and track helps me sustain my drive towards goals. Even if a challenge seems daunting at first, I am always eager to listen and learn from my peers, work together with others, and gain experience through my mistakes to get the problem solved. I am looking to enhance my data science and computer science skills through hands-on application at a full-time position.

EDUCATION

Bachelor of Science Degree, Graceland University, Lamoni, IA — May 2025
Majors: Data Science, Computer Science, Mathematics — GPA 3.5

PROFESSIONAL & CAMPUS LEADERSHIP EXPERIENCE

Data Engineer Internship, Wellabe, Des Moines, IA — Summer 2024

- Built out and created scheduling for multiple ELT pipelines inside of Databricks Lakehouse using SQL, Python
- Utilized Excel and SQL to cross examine data sheets for errors in order to create streamlined testing
- Created insightful Power BI dashboards to display insights and key takeaways from aggregated data

Software Engineer Internship, Hammer Built, Earlham IA — Summer 2023

- Utilized unit testing and data analysis on user data to improve application interface and readability
- Developed front-end of web application using HTML and CSS and backend using JavaScript and PHP
- Communicated effectively with team members to produce a quality and responsive web application

President of Association for Computing Machinery (ACM) Club, Graceland University, Lamoni, IA. — 2023-2024

- Lead and direct meetings for 20+ club members as well as come up with and maintain club activities
- Organized workshops, presentations, and coordinate teams at national coding competitions and conferences
- Presented machine learning data science project at Scholar's Showcase as a sophomore to group of 25+ peers

TECHNOLOGY PROJECT SUMMARY

Build Custom RAG AI model Application — Sprint 2025 https://github.com/JFlic

- Built data ingestion pipeline to scrape websites, 120+ years of local newspapers, and town ordinances using Python
- Designed PostgreSQL-based vector; implemented semantic search with reranking powered by qwen3:1.7b
- Developed a responsive frontend in Next.js with FastAPI to manage interface and user interactions

CERTIFICATIONS

Databases and SQL for Data Science with Python Certificate, IBM — December 2023

Deep Learning Certificate, NVIDIA, Santa Clara, CA — April 2022

Google Data Analyst Professional Certificate, Google, Mountain View, CA — expected completion January 2025

ADDITIONAL LEADERSHIP AND PROFESSIONAL EXPERIENCE

Computer Science Club VP (2022-2023)

NAIA Cross Country and Track (2021-present)

Enactus (Entrepreneurs in Action) (2021-present)

Highschool Improv Champion (2019-2020)

YurTern College internship certificate(2024)

Menards Inventory (2022-2023)
